

HGD External Screen

An external display that aims to show weight information in different areas.

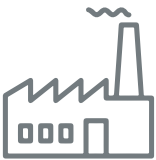

ABOUT PRODUCT

HGD external display is a product that aims to display the weight information from industrial weighing indicators in different areas. It allows the value displayed on the weighing indicator to be shown on a larger screen and at a different location.

It can be used in any environment where it is desired to view weight information externally, such as in crane systems, truck scales, and silo storage systems.

You can easily see the weight information remotely with a 16-inch character size. The HGD External Display can communicate with all indicators worldwide.

APPLICATION AREAS

Machinery And
Industry

TECHNICAL SPECIFICATIONS

Display	16x64 Nokta LED
Connection	RS232
Housing	Painted Steel and Stainless Steel
Energy Source	Vin : 5 VDC Power : 50 W Lin : 10 A
Temperature	-10C ~ 45C , 85%RH
