ABOUT PRODUCT

ID551 rail type weighing control indicator is a high precision and high accuracy industrial weighing process indicator used in weighing, filling, dosing and weighing packaging applications.

By expanding the optional interface, real-time field bus communication for PC, PLC, DCS and other equipment can be realized.

ID551 is widely used in metallurgy, chemical industry, construction materials, paint filling, food and feed industries.

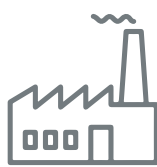

APPLICATION AREAS

Agriculture and
Livestock

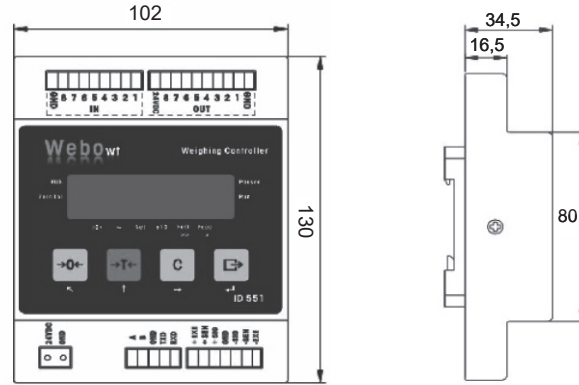

Food

Machinery and
Industry

TECHNICAL DRAWING

Indicator Model	Box Type	Hardware	I / O Options	PLC Interface	Application	Language	Power

ID551	P: Panel Type	0: Standart	0: Standart	0: NONE 1: IN x 8 / OC OUTPUT x 8 2: IN x 8 / ROLE OUTPUT x 8 A: 4-20 mA x 1	0: Standart	1: English	D : 24 VDC Güç Kabloşu Yok

TECHNICAL SPECIFICATIONS

- 6-bit 0.28" Red LED Display and 10 State LEDs
- 100,000 Display division, 6000e
- 200Hz A/D SPS, 200 Hz Target compare speed
- 5 Steps dynamic filter, High level vibration filter
- Standard seri ports (RS232/485) MODBUS - RTU Communication
- Peak hold, Tension Test
- Target Control 2 Fast
- Double Speed Liquid Filling Feature
- CHECKWEIGHER
- Bagging with PLC or Via Indicator
- Bag Filling With Screw and Air Valve
- Standard 8 IN / 8 Output (OC)
- Housing suitable for DIN rail mounting
- Housing support to DIN Rail mountage
- Hand Type Plastic Case
- Rechargeable Battery 7.4V / 2500mA to 8.4V / 1A Charging Adapter
- 10C ~ 45C , 95%RH
