

GTI Weighing Indicator

A weighing indicator designed for use in tanks, silos and scales with a high precision AD converter.

www.weilo.com.tr

ABOUT PRODUCT

GTI weighing indicator is a weighing indicator designed for use in tanks, silos and scales with high precision AD converter.

Without reference dead load (mV Calibration), Adjustable coefficient Kg and Liter conversion mode

Live animal weighing mode It can make rupture test with peak holding feature.

Long-term work with auto off and sleeping mode.

Rechargeable integral lead acid battery.

External large display, printer or PC connection with RS 232 communication.

APPLICATION AREAS

Agriculture And
Livestock

Machinery And
Industry

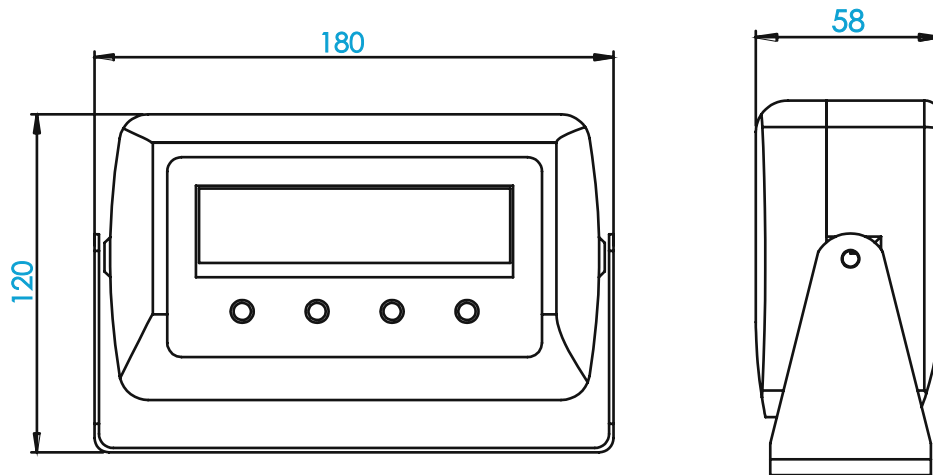

Logistics And
Transport

Food

TECHNICAL DRAWING

TECHNICAL SPECIFICATIONS

Accuracy Class	1/30000
Display	20mm LED
Status Displays	7 pcs Status LEDs
Keypad	4 Mechanical Switch Button
ADC	Δ - Σ Delta-Sigma 24 bit
A/D Conversion Speed	10 SPS (Sample Per Second)
Resolution	0.6 μ V/e, Non-Approval: 1/30.000
Input	-15mV ~ +15mV input range
Excitation Voltage	5V DC Max 150mA
Load Cell Count	Max 6 x 350 Ω
Calibration	With reference dead load or mV/V (mV Calibration) Calibration
Filter	3 steps digital filter
Weight Units	Kg, lb, Liter, Ton, Newton
Serial Ports	Com1 - Rs232
Power Supply	External AC Adaptor: AC110~220V 50hz
	Integral rechargeable 6V/1.3Ah battery
Operation Temperature	-10 ~ 40°C Condensing R.H. 85%
Housing	ABS Plastic
Weight	1.1 Kg
